Canoeing

This article is part of a series produced by the British Council to help you learn English and learn about different Paralympic sports.

Canoeing is an activity which goes back thousands of years. It has been a popular Olympic sport since the 1930s, and is one of three new Paralympic sports in Rio in 2016.

ACTIVITY

Match each of the people (1–4) to one of the statements (a–d) according to the information given in the text.

1. Nick Beighton
2. Marta Ferreira
3. Fernando Fernandes
4. Emma Wiggs

DID YOU KNOW?

Becoming a professional Paralympic athlete

In Brazil 2016, canoeing is one of three new Paralympic sports. When a sport is approved for the Paralympics, it brings a lot of excitement to its athletes.

For many, it allows them to become professional sportmen or sportswomen who can spend their time focusing on their abilities rather than their impairments. This is the case of the British Paralympic canoe team who are now spending six days a week training for the Brazil 2016 competition.

But becoming a Paralympic athlete not only gives these athletes something to focus on. As team member Emma Wiggs says, ‘Being a Paralympian has given me my identity back. It has given back a part of me that was missing’.

Another British team member is Nick Beighton, a former British soldier who was injured in Afghanistan. He feels that winning a gold medal in Rio will allow him to completely forget about his injury. ‘It will show that the injury is behind me,’ he says.

It is not just the British team who are extremely excited about the benefits of being Paralympic athletes. Brazil’s Marta Ferreira thinks that, after watching the sport in 2016, ‘more people will become interested and Brazil will gain new athletes.’

Her teammate Fernando Fernandes comments on the benefit it brings to people’s view of disabled people: ‘The Games make Paralympic athletes look like superheroes, and this creates a lot of confidence’.

Seeing as the Paralympics has such a positive effect on so many disabled people, let’s hope that the number of sports that are included continues to grow.

RULES AND CLASSIFICATION FOR PARALYMPIC CANOEING

What is it?

Paralympic canoeing involves racing in a special kind of boat. In Paralympic canoeing only kayaks are used. Athletes race their canoes against each other in short sprint events. Kayaks are specially adapted to the needs of disabled athletes.

Who can participate in canoeing at the Paralympics?

Canoeing is open to athletes with a range of different physical impairments.

Classification

There are three different classes which are decided by the number of points an athlete receives. Athletes who are able to move their body and legs more are given more points.

KL1: 1–3 points
KL2: 4–7 points
KL3: 8+ points

How is it played?

• All events are individual events for either men or women.
• A race consists of up to eight athletes competing against each other.
• All races take place over a distance of 200 metres.
• Kayaks can be a maximum length of 5.2 metres. They must also weigh at least 12 kilograms.
• Athletes move the kayak by paddling using an oar.
• The kayaks must stay in the lane the athletes are given during the race.
• The winner of a race is the athlete whose kayak touches the finishing line first.
